controls are horrid and all labelled with numbers instead of key or controller button icons. menus within menus are a total mess. can't hide armour. bad.

extremely bad. music's bad too.. it's pretty fun difficult to figure out but still kind of fun  
. I recently bought this dlc, with a half price, maybe it still too expensive, but the content is worth much... It was such a fun game to play!! This is a reimagining of the Pelorian Wars RPGMaker game into more of a tactical RPG. It is slightly more streamlined and straightforward. Would recommend.. I love playing this game and cannot get enough of it. Once I figured it out, I don't seem to be having much fun. Flying is irritating, and my curiosity doesn't seem to be stimulated when exploring these dark ships.. OK, I play for a couple of hours. Graphically the game looks very nice and supports nVidia 3dVision (woo hoo). I played only "Normal" and "Master" AI. Normal seemed way too easy. Master did play well.

The game crashed 3 times while playing. This was bothersome, especially when I was ahead.

The "Undo" feature should be on by default. A few times the game would make moves that I didn't want when I was dealing with a double roll. Perhaps I was clicking incorrectly. When I found and enabled the "Undo" feature, it would crash when I used it. Again this was when I was dealing with a double throw and I wanted a different move.

Roll button and Double button are too close and I clicked double by mistake on a few occasions.

I didn't try the online feature yet.

I will recommend hoping the devs will fix little minor complaints.

---

Great game! Funny too.. I learned about the original ODD board game a couple months ago when I was searching on Amazon for D&D dice. Fast forward to launch day and I see ODD pop up as a new release on Steam. Definitely worth the \$10. I will be looking forward to future content.. Fantastic mod for a very little known front in the war, the smallest details are perfectly done for such a small modding team they did an excellent job feels like a paid DLC. Fun game if you want a life sim. Imagine if I told you that there was a beat em up with no punch, kick, or jump buttons and your only means of attack is to defend against all the enemies. Sounds pretty terrible, right, a beat em up with no elaborate combos, special moves, weapons, or anything else you have to come to expect from the genre. That's what way of the passive fist is, an old style beat em up with no attack button, and it is amazing!!

If you watch the trailer for this game it looks like it would have been right at home in an arcade in the mid 90's, nice colorful graphics, a decent number of enemy types, complete with generic palette swaps. But as the name implies, this game is all about being passive. Your character has 3 moves, a block, a dodge, and a dash. Your job is to defend against the enemy attacks using these 3 evasive maneuvers, doing so tires them out and when they are completely out of stamina they bend down to catch their breath and you gently push them to the ground.

Every enemy has their own attack patterns and learning and reacting to these patterns is the key to success. The game has a very rhythmic feel to it as you time every dodge and parry and you feel like a total badass shrugging off mobs of enemy attacks and then gently shoving them away as if they are completely worthless. The game is constantly introducing new enemy types and palette swaps of old enemy types and every different color has a different attack pattern. There are also enemies who throw objects at you that can be caught and thrown right back at them for an instant ko.

Despite the passive playstyle this game is actually pretty frantic. Like any good beat em up mobs of enemies come on the screen at the same time and there are many levels with environmental hazards that need to be avoided as well, these can also hurt enemies and can easily be used to your advantage. So dashing around the screen to get a good position is very important in this game. Luckily, enemies never attack more than one at a time, so you are never in a cheap or unavoidable position.

Earlier I said there was no punch or kick and that is partly true. You unlock special moves as the game progresses that can be unleashed after a few successful blocks. block 5 in a row and you can throw one punch that damages big enemies and kills smaller enemies, 12 in a row gets you a power slam that kills just about any enemy and damages the rest on the screen, 25 in a row gives you a screen clearing gravity crush attack. Use of these moves makes killing enemies quicker and are vital to damaging bosses.

The game is broken up into 10 levels, about half end in a boss battle. The bosses are all well done, some require you to build up energy on their cronies and then use that to smack them, some are just a straight up one to one brawl.

This is one of the most unique and fun games I have ever played. It retails for \$15 which put me off initially because I was worried the game would be a gimmicky mess, but this game completely blew me away. It is tons of fun, leaves you feeling very zen, and there is honestly no game like it out there. It is absolutely something that every gamer who is into beat em ups or just want to try something original should check out.. achievement game

no u. Driving a giant tank without any background or motivation through a bunch of war or battle grounds is fun. For all you know, you could be the villain, tanking (?) through the hordes of nice democratic people tanks. The game doesn't care, or at least didn't tell me. What it told me, is how to aim and shoot, how to switch between tank cannon and machine gun, how to move and how to change volume settings. That's it, no further option, nowhere. Still the game looks good and gives me the "Raptor" 1995 vibe. Lovely little game.

EDIT: And I spoke too soon. LITERALLY one level after my initial review the game ended, I destroyed the red vile island and save the universe. There was story (?). But then again, 20minutes of gameplay isn't really enough, not even for 4\$. So still a lovely game, but longer and more compelling ones are out there ... for less money. Btw I left the game idly open for a few hours to at least get a few trading cards. Then I forgot about it and now have a few hours of playtime, which are completely wrong. 20 minute game.

**Counter-Strike: Global Offensive Update Released:**

Release Notes for 5/7/2014

---

[MATCHMAKING]

- Fixed buytime ending as soon as all players join in QMM.
- Increased warmuptime when all players are connected from 30 sec to 60 sec

[UI]

- Fixed the default radar scale and money position settings overlapping with the spectator UI in the most common resolutions.
- Dropdown panels now support more than 20 options.
- Fixed inventory grenades icons drawing black.
- Fixed the bottom position player counter being a bit too low and cut off.
- Fixed hud alert flickering.
- Fixed Deathmatch Bonus Panel overlapping excessively with radar in extreme cases.
- Optimized some hud options code which improves performance.
- Money position relative to radar now considers safezone.
- Fixed HUD background alpha not saving if you set cl\_hud\_background\_alpha to 0.

[SDK]

- Added concommand 'rangefinder' for map makers (provides 2d and 3d distance to target).
- In Demolition games, the last weapon can be any weapon and trigger the end of round logic if enabled.

[MISC]

- Added Effective range and rangefinder functionality to cl\_weapon\_debug\_print\_accuracy convar.
- Fixed bad hostage icon positioning in some cases.
- In DeathMatch it now says the right name for all guns.
- In Demolition games, the next weapon panels now work for all guns.
- Optimized backend performance when when accessing CS:GO inventory on Steam Community.. **Discord channel:**  
<https://discord.gg/TH4MCCG>

Here is my Discord channel where I post news about my upcoming games, updates and patches and make codes giveaways.

. **New old game appeared in our collection!:**

The game is made in the best traditions of the old-school horror and survival games. Despite some technical flaws, due to the limitations of the engine, the game even today looks good. Such a game should definitely be in the collection of every horror game lover.

We really believe that the game deserves a second chance and may appeal to a large number of players.

[https://store.steampowered.com/app/264480/BlackSoul\\_Extended\\_Edition/](https://store.steampowered.com/app/264480/BlackSoul_Extended_Edition/). **UI Graphical Update:**

Although this might not be the craziest of the updates, it is a few small changes that I am quite proud of with the short amount of time that it was accomplished.

What's been added?. **Working on a better Mission Briefing:**

We've received some wildly divergent feedback for the Mission briefing screen. While some of players thought the dialogues were slow and boring, others were having a hard time reading everything in time !

In order to please everyone, we made the dialogues advance on keypress, while also remaking the whole page. It looks more slick, and we also added some useful mission details and controls.

Can you also spot something else in this screen? A new feature, perhaps?
